

European Union Nuclear Education Training (EUNET)

Objectives

This is a one day workshop funded by the Foreign & Commonwealth Office and organised by ENEN III, National Skills Academy for Nuclear and UCLan. The day will promote the education, training and skills retention initiatives that are occurring across the EU to support both the existing nuclear industry and new build. Speakers from the leading UK organisations involved with E&T and the development of a skills passport will be complemented by other speakers representing EURATOM and ENEN III project.

The day's programme has been developed to allow end-users to communicate their requirements / needs to the providers and to consider if the UK's approach to the skills passport is transferable into mainland Europe.

Programme

Morning session:

How are we protecting our future?

- 09.45 Registration and refreshments
- 1015 Welcome address from UCLan
- 1030 **Jean Llewellyn OBE, Chief Executive, Skills Academy**
Ensuring the Capability and Capacity to deliver skills required to support the UK Nuclear Programme
