

# Engineering Opportunities

MECHANICAL ENGINEER • ELECTRICAL ENGINEER • CONTROL ENGINEER • GRADUATE ENGINEER

Excellent package and prospects at a forward looking company

Sembcorp UK is a major supplier of industrial utilities to large international companies in key manufacturing sectors including chemicals and biofuels. Based at the Wilton International site on Teesside, and part of Sembcorp Industries, a Singapore-based global energy, water and marine group, we have invested almost £200 million in recent years building new and improving existing assets and further major investment is planned.

Sembcorp is a pioneer in biomass-based renewable energy in the UK and a recent £64 million investment in 'wood to energy' production will soon be matched by a £200 million energy recovery facility helping to address pressing UK energy supply and Climate Change issues. Our other assets include a 200MW coal fired cogeneration power station and gas turbines which collectively provide stimulating daily challenges for our skilled operators, engineers and business managers.

Sembcorp is looking for self-motivated engineers to grow with the company.

• **Graduate Opportunities** We are seeking graduate engineers in the disciplines listed above to join our graduate programme. We're looking for people who will develop into key professionals to take our business to the next level of success.

• **Engineers:** We also require experienced engineers (particularly mechanical, electrical or control who are probably working towards Chartership status) to develop and implement solutions to complex engineering challenges. Previous experience of combined heat and power, plant transmission and distribution systems would be an advantage.

**Interested?** We would love to hear from you. Please complete our on-line application form on our Careers Page at: [www.sembcorp.com](http://www.sembcorp.com) or post your current CV and salary expectations to us at the address below or email [jobs@sembcorp.com](mailto:jobs@sembcorp.com).

**We want you to help drive the company towards an exciting new future - because at Sembcorp UK it's people that make the difference.**

Human Resources, Sembcorp Utilities (UK) HQ  
PO Box 1985, Wilton International  
Middlesbrough, TS90 8WS
