Summary of Action Plan

To address urgent need **immediate action** will be taken to:

- resolve actions on skills signals across employers and universities
- seek new ways to address urgent skills gaps
- deliver exemplar vocational pathways to higher education
- articulate a clear vision of careers for the sector.

In the **medium term** a broader series of actions for development are proposed:

- better utilisation of pathways to professional status
- embedding leadership and management
- brokering laboratory placements
- future skills demands of the bio economy in general.

Key Themes

- Resolve actions on skills signals across employers and universities -Placements
- Seek new ways to address urgent skills gaps-Apprenticeships/Placements
- Deliver exemplar vocational pathways to higher education-Apprenticeships
- Articulate a clear vision of careers for the sector-Professional Development

In the medium term a broader series of actions for development are proposed:

- Better utilisation of pathways to professional status -
Apprenticeships/Placements/Professional Development
- Embedding leadership and management-SME
- Brokering laboratory placements-Placements
- Future skills demands of the bio economy in general -
Placements/Apprenticeships/SME/Professional Development
